He Will Talk Things Over With Grandma -German Newspapers and Their Esteemed Contemporaries-Mr. Guidstone's Iliness.

London, July 20,-Very it is confidence is

placed in the statement that the Dure of Devonshire soic Queen Victoria that she swould have to abdience the "brone or make" terms with Mr. Glacstone. It is known that the queen cic have an earnest and important interview with the nobleman, whom she holds in right regard, and whom she would fain make premier if ic were wiking and the country would be willing to accept him, The queen, it is reported on good nut tority, sent for the duke to discuss with him toe formation of a cabinet that would be as litde objectionable as possible to her Tory notions, for her majes by regards tome rule as on y one step short of a so ate treason, and its promoters as enemies of the prirone. The dure found her majesty aboring under greater emotion than he had ever seen her display. After the usual courteous formalities the queen asked the duke abruptly whether there was any way to avoid sending for Mr. Chacatone. Her majesty acced insubstance: "To Mr. Giacstone personal y cave no objection; out I do object to the separation of my singeoms, to which I uncerstand le las pleaged himseld." The cake replied most courteously, but in terms that could not be misunierstood, that

while he himself deeply repretted the course taken by Gladstone, which and compelled him to leave that gentleman's side politically to strive for the maintenance of the union, yet he felt obliged to recognize that a majortry and been elected to the nouse of commons favorable to Mr. Gacstone's views. Her majesty took the carefully worked intimation and said no more on that partiular subject. The queen, however, has continued to make no concealment of her antipatry to Er. Glacitone as the home rule champion, and it is believed that she will yet place some obstruction in the way of some rule.

Mr. Gladstone's attack of inness has not proved so serious as was anticipated, but the alarm which it caused has not quite abatel. The sucdenness with which the attack came on is the most a arming feature, and apprehension is expressed that it may be the beginning of a series of attacks of a similar character that may sap away the wonderful vigor of Mr. Gladstone at a time when he is needed to carry Irish nome rule farough to success. It won't take all of Mr. Gacstone's wonderfu, influence to sold the majority together for home rule. The demand that nome rule shall be shelved is growing louder and louder and it seems doubtfuthat even Mr. G'acstone can noid some of his so-called followers to a final vote for a nome rule measure. The labor candidates are demanding that labor questions sua be given precedence, and it is said that fully seventy-five Liberals outside of the labor ranks are in favor of she ving home rule. The Irisa Nationalists on the other dand say that their support will be at once withdrawn from the government if any disposition is shown to postpone justice to Treland. The Tories are watering the scene with amused interest, as if they expect to see a regular American row between the discordant elements that are behind the vote of "no confidence." Mr. Balfour is sharpening his e equence for the fray and other Tory orators are ooking forward to the strugglewith evident satisfaction.

At present the prospects of home rule aruncertain, except that it is certain that the house of lords will reject a home rule measurement
